

WILLBURG LABEL APPLICATOR

The low-cost, high-precision labelling machine.

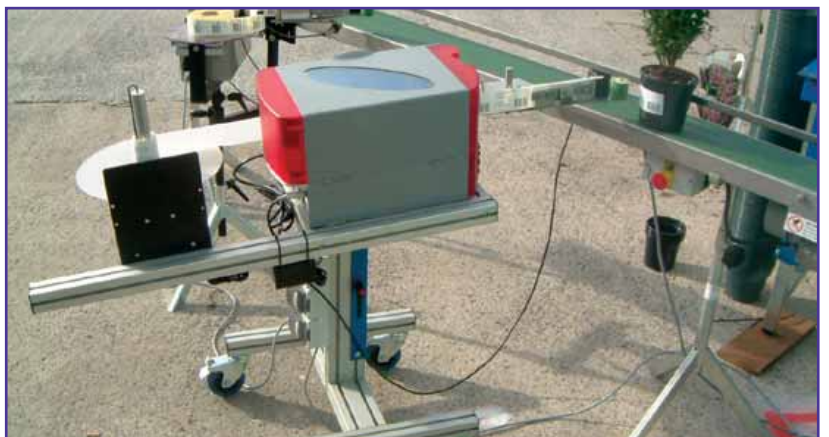

A stand-alone system that can be mounted on the side of any make of conveyor system.

- ▶ High capacity: applies up to 10,000 labels per hour using a small label; capacity decreases as the label size increases.
- ▶ Easy to use with only two switches: one each for power and for speed.
- ▶ Adjustable frame enables easy locating of the labeller where you need it.
- ▶ Extra long application beak keeps the label reels away from the labelled pots.
- ▶ Stainless steel construction for long life.
- ▶ Low maintenance.

OPTIONS

- ▶ Extra sponge rollers for applying larger labels.
- ▶ Adjustable rails to support the pots.

▲ Willburg also offer a **Print & Apply** system, utilising the same application beak as the Labeller and an in-line printer from Avery on self-adhesive labels up to 105mm wide. This combination offers you great flexibility and savings, lowering your despatch costs overall. We look forward to discussing your labelling requirements with you.
